PROJECTS

Unity Educational game for kids

2024

- Developed and programmed an educational game for children aged 4 to 7 on Unity to teach the alphabet and numbers.
- Engineered an interactive letter-learning system, each of the 26 letters features an image of its shape, an example of a word that starts with the letter, and an audio for pronouncing both the letter and the example.
- Also, the game contains quizzes about the alphabet and numbers and the way of answers are diverse.
- There is a timer and score for each quiz across questions. The time consumed in the quiz, the score obtained and the selected character in the beginning are displayed at the end of the quiz.
- **Technologies used:** C#, Unity

Arabic Programming Language Compiler

2024

- Designed and developed a custom compiler for an Arabic-script programming language to support Arabic-speaking beginners in learning programming.
- Built a user-friendly GUI with Tkinter that supports Arabic script and displays error messages after code execution.
- The project focuses on educational use, featuring an accessible syntax while implementing key compiler components including lexical analysis, syntax parsing, and semantic validation using Python.
- **Tech Stack:** Python, tkinter

Computer vision Fitness Coach

2024

- Created a computer vision-based program to track and count weightlifting exercises in real-time.
- Implemented angle-calculation logic (shoulder-elbow-wrist) to count repetitions and classify exercise phases (up/down).
- **Tech Stack:** Python, OpenCV, MediaPipe

Desktop Educational game for kids

2024

- Designed and built an interactive desktop application educational game targeting children aged 3 to 5.
- Implemented an engaging UI with Windows Forms to enhance accessibility and ease of use.
- **Tools & Frameworks:** C#, Windows Forms

AWARDS AND ACHIEVEMENTS

- Participated in ECPC- Egyptian Collegiate Programming Contest- Qualification 2024: Ranked #63/450 teams (top 14%).
- Solved 800+ problems on Codeforces, demonstrating expertise in dynamic programming, greedy algorithms, and data structures.
- Achieved third place at university chess tournament for 2 years in a row: 2023, 2024

EDUCATION

Assiut University

BSc in Computer Science

Assiut, Egypt

Fall 2021 – June 2025

Training

* ICPC Newcomers Training 2022

* ICPC Newcomers Winter Camp Training 2024

* ICPC Phase 1 Training 2024

* ICPC Phase 1 Winter Camp Training 2025

SKILLS

Programming Languages: C++, C#, Python, HTML, Golang

Conceptual Knowledge: OOP, Data Structures, Algorithms, Data Bases: MySQL, Backend Development

Frameworks: ASP.NET, Windows Forms

Soft skills: Problem solving, Teamwork
